DRUMMOTORS & MORE LTD

Suppliers of electro-mechanical power transmission to industry
INDEPENDENT AND TRULY CUSTOMER FOCUSED

New, Repair and Spare...?

LOWER POWER DRMUMMOTORS
A range of quality low to medium power units, fully assembled in our workshop, available on quick delivery times or premium service sameday courier available.

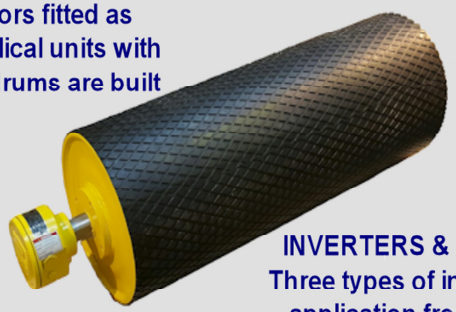

ADVICE and CONSULTANCY
As an indepentant company we can help select the appropriate drive for any application. We can advise on all aspects of materials handling and select the right product at the right price from our carefully selected supply partners.

SERVICE and REPAIRS
Fully equipped workshop in Leicestershire allows us to offer full repair and test facilities for the majority of drummotors and other power transmission products. We can give a full condition report and repair cost estimate prior to commencement of any work.

MEDIUM POWER DRMUMMOTORS
Our range of quality medium power drummotors are available from 0.55kW to 4.0kW and are available upto 320mm diameter. Built from the highest quality materials, with energy efficient class H insulated motors fitted as standard, gearboxes are precision built helical units with all gears manufactured to DIN class 6. All drums are built to IP66 as standard.

DRUMMOTORS & MORE LTD

Thorite Drummotors
With the limited stock of spare parts available for the old Thorite drummotors, we can still offer a repair and service but if this proves uneconomical to repair we can offer a dimensionally interchangeable replacement.

HIGH POWER DRUMMOTORS
Available upto 132kW with a diameter of 320 to 800mm. For high power drummotor application or for the replacement of the large and obsolete Thorite superdrive range.

INVERTERS & ELECTRONIC CONTROLS
Three types of inverters available to suit any application from basic operation to more complicated integrated control systems. We can select the appropriate unit from our selected partners.

Rubber Covering Options
We offer different types of rubber covering in various colours, thickness and finishes for new builds or refurbishment for rubber with signs of wear and tear. We can also add tracking grooves and pattern lagging if required.
